

Sunglass lenses with NeoContrast™

Sunglass lenses without NeoContrast™

Increases your ability to take in our spectacular visual world.

An innovation in sunglass lenses
You'll see a world you've never seen before.

NeoContrast™

NeoContrast™
lens technology

NeoContrast™ makes vision clearer and colors more vivid. New NeoContrast™ with sunglass lens functionality.

Technology

The NeoContrast™ technology decreases glare by selectively blocking specific wavelengths. Objects appear clearer and brighter in color.

Lens Material

- Available for premium high refractive index MR™ series.
- Available for both prescription and nonprescription lenses (refractive index 1.60, 1.67).

*MR™ series materials make it possible to produce thin, light lenses, even for strong prescriptions.

Products offering various combined functions

Polarized

Recommended especially for marine activities like fishing and watersports.

- Incorporates water-resistant PET polarized film.
- Easy care.
- Combines polarization and NeoContrast™ technology for even clearer vision.

UV and high-energy visible (HEV) light blocking

Protects eyes not just from glare, but from short-term and long-term eye damage resulting from exposure to sunlight.

- Blocks 100% of UV light.
- Blocks HEV light up to 420 nm—light that reaches the retina after passing through the cornea and lens.

Photochromic

Protects your eyes from glare, both day and night.

- Can be worn both indoors and outdoors, day or night.*1
- *1 The lens will impart a slight bluish tint indoors and in dim lighting.
- Reduces the glare of bright headlights and neon lights when driving and at night.
- Combination with NeoContrast™ technology results in vivid colors, even when the lens darkens.

Color lens

Select an ideal lens color depending on your intended activity and typical light conditions. NeoContrast™ is compatible with all colors and provides clearer vision.
