Startup of Phenol and Acetone Plants in Shanghai

Mitsui Chemicals, Inc. (Tokyo, Japan; President & CEO: Tsutomu Tannowa, "MCI") and China Petroleum & Chemical Corp. (Beijing, China; President: Li Chunguang, "Sinopec") announced the startup of phenol and acetone plants under their joint venture, Shanghai Sinopec Mitsui Chemicals, Co., Ltd. (Shanghai, China; Chairman: Hou Yong, "SSMC").

The startup, together with a bisphenol-A plant which commenced operations in January 2009, is one of the world's most performance-driven, competitive phenol chains covering all production stages from raw materials to derivatives.

<SSMC and Plant Outline>

(1) Company name	Shanghai Sinopec Mitsui Chemicals, Co., Ltd.	
(2) Location	Shanghai Chemical Industry Park, Shanghai, China	
(3) Establishment	April 10, 2006	
(4) Capital	950 million RMB	
(5) Ratio	MCI 50%、Sinopec 50%	
(6) Business area	Manufacture and sales of phenol, acetone, and bisphenol-A	
(7) Production capacity	December 2014: phenol	250,000t/year
	acetone	150,000t/year
	January 2009 : bisphenol-A	120,000t/year

About [Mitsui Chemicals](#) (Tokyo: 4183, ISIN: JP3888300005)

Mitsui Chemicals' roots can be traced back to 1912 when it began producing raw material for chemical fertilizers from coal gas byproducts, the first company in Japan to do so. This undertaking significantly contributed to increasing agricultural productivity, a major social issue at the time. Later, the company evolved its technology from coal chemicals to gas chemicals, and in 1958 it built Japan's first petrochemical complex and so provided impetus to Japan's industrial sector. Today, the company boasts many world-class products with sales standing at 1.5 trillion yen and with over 135 companies in 27 countries. Its business portfolio includes environment-friendly materials for next-generation vehicles, healthcare services to realize health and happiness in an ageing society, packaging that ensures the reliability and safety of food products, agrochemicals that contribute to increased production of food, electronic materials, and environment-friendly materials for the energy sector.

Mitsui Chemicals will continue to contribute to solving social challenges with its state-of-the-art technology and by "Creating New Customer Value through Innovation".
